

TREND MICRO

A Global Leader in Internet Content Security and Threat Management.

As a pioneer in server-based antivirus solutions with over 20 years experience, Trend Micro creates a safer world for businesses and consumers to exchange digital information. Trend Micro delivers top-ranked security solutions that fit customers' needs, stop new threats faster, and protect data in physical, virtualized, and cloud environments. Powered by the industry-leading Trend Micro™ Smart Protection Network™ cloud security infrastructure, Trend Micro's solutions stop threats in the cloud, delivering proactive protection faster than any other security vendor. Test results¹ confirm the effectiveness of the network at blocking over 5.3 billion threats daily for customers worldwide.

A History of Innovation.

Since 1988, Trend Micro has continually delivered innovative technologies and services that protect users against both known and unknown threats. Today, a new threat appears and spreads via the web every 1.5 seconds. In response, Trend Micro was the first to extend threat protection from the desktop to the server and to the Internet gateway—leading the industry in bringing content security to virtualized and cloud-computing environments.

Customer Focus.

With a singular focus on Internet content security and threat management and an ongoing dedication to customers, Trend Micro delivers a range of security solutions and services that provide maximum security, flexibility, and performance with minimal administrative burden. Because the threat landscape and customer's needs continue to evolve, Trend Micro offers a choice of software, virtual appliances, and Software as a Service (SaaS) security offerings for improved customer management options and faster access to threat intelligence that blocks new threats in the cloud. Trend Micro also safeguards against data-stealing malware and data leaks with new data leak prevention and encryption solutions. In addition, Trend Micro protects physical, virtual, and cloud servers from vulnerabilities and malicious activity by offering server and application protection for dynamic datacenters.

Security That Fits.

Trend Micro provides security solutions that fit the threat landscape, varying IT infrastructures, partners' ecosystems, and customers' individual needs. By tailoring solutions to each unique situation, Trend Micro delivers the latest in security protection—for mobile devices, virtual appliances, routers, third-party integrated solutions, and physical, virtual, or cloud servers. Partnerships with other security vendors ensure that additional solutions can be integrated to leverage existing investments.

Protection in Many Forms.

Trend Micro offers a range of protection across multiple platforms, for varying sizes and types of companies. For example, Trend Micro™ Enterprise Security offers tightly integrated content security solutions and services for better, faster protection and less complexity than traditional offerings. Trend Micro™ Worry-Free™ Business solutions are built for small businesses, and the Trend Micro™ Internet Security line delivers lightweight, fast, automated protection in easy-to-use packages for consumers.

Global Threat Intelligence and Rapid Response.

Trend Micro delivers timely threat intelligence, service, and support to a global customer base and defends tens of millions of consumers, small businesses, and enterprises round-the-clock through TrendLabsSM — a worldwide network of threat research and product service and support centers. Within dedicated, global service centers, Trend Micro's employees, including more than 1000 threat experts, monitor potential security threats and mount rapid responses to major security incidents and urgent support requests.

As new threats and vulnerabilities emerge, Trend Micro remains committed to timely threat intelligence and ongoing innovation to help customers secure data, ensure compliance, reduce costs, and safeguard business integrity.

Cleans browser history, cookies and more to enhance performance			✓
Includes 10 GB of secure online backup with Sync and Sharing features			✓

Security Products for **SMALL BUSINESSES** 5-100 computers

Many small businesses don't have an information technology staff, so they need a web security solution that's fast, effective, and simple. The business software solution must protect them from web viruses, hackers, and cyber attacks. They need Trend Micro™ Worry-Free™ Business Security solutions

Worry-Free™ Business Security

Provides fast, effective, and simple protection against web viruses, cybercriminals, and data loss, so you can focus on your business instead of worrying about Internet security. Worry-Free is ranked #1 in independent tests at blocking Internet threats BEFORE they reach your PCs; Mac computers; file and mail servers — increasing protection, while preventing computer slow down

If you have mail servers, file servers, and multiple PCs and Mac computers, you need:

Advanced Edition

This single solution is designed for businesses with limited IT resources so it's easy to install and doesn't require expertise to use. The latest Advanced edition keeps business information private by locking down USB drives and other storage devices.

Also, it stops data loss through email, blocks spam both before and on the Exchange Server, and secures both Macs and PCs.

If you have file servers and multiple computers, you need:

Standard Edition

This single solution is designed for businesses with limited IT resources so it's easy to install and doesn't require expertise to use. It features security scans that run quickly and quietly in the background and keeps business information private by locking down USB drives and other storage devices.

It also prevents infections from USB devices, secures Wi-Fi connections, and includes URL filtering to block access to risky websites

If you have file servers, multiple computers, and want a hosted (off-premise) solution, you need:

Worry-Free™ Business Security Services

Protect your computers in the office, at home or on the road with a hosted security service by Trend Micro. It's as easy as 1, 2, 3, to set up, then enjoy the same protection as Worry-Free Business Security Standard solution.

Medium Business 100- 1000 computers Enterprise 1000+ computers Products

End point Security

Enterprise security for Endpoint

- Office scan
- Serverprotect for windows/Netware
- Mobile security
- Security for Mac
- Intrusion defence firewall
- Virtual desktop security
- Endpoint security platform
 - Core protection module
 - Web protection module
 - Patch management module

Web security

- Interscan messaging security
 - Virtual appliance
 - Software
- Advance Reporting and management
- InterScan WebProtect for ISA

Messaging security

- Interscan messaging security
 - Virtual appliance
 - Software
- Hosted Email security
- Email encryption
- Email reputation services
- scanMail
 - For Microsoft Exchange
 - For Lotus Domino
- PortalProtect for Microsoft SharePoint
- IM Security for Microsoft
- Enterprise security for communication and collaboration

Data center security

- Deep security
- Core protection for Virtual Machines
- Virtual desktop security
- ServerProtect for windows
- ServerProtect for Linux
- ServerProtect for EMC Calerra
- ServerProtect for NetApp Filers

Data protection

- Data loss prevention
- Secure cloud
- Email encryption
- Encryption for Email client
- OfficeScan
- Encryption for Email gateway
- Hosted Email Encryption
- Endpoint Encryption

Central management

- Trend Micro control manager
- Endpoint security Platform

Solutions and services

- Enterprise security suites
 - Enterprise security suites
 - Enterprise security for Endpoint
 - Enterprise security for Endpoint and Mail Servers
