Kaspersky PURE

Total protection for life online

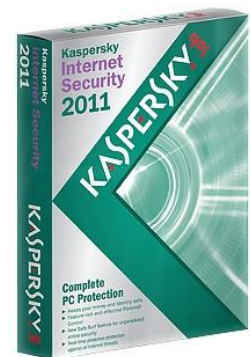

Kaspersky PURE gives you much more than just antivirus software. It's everything you need to protect all the most important assets in your digital life: your computer, your online accounts, your most valuable data... even your family. It gives you the peace of mind of knowing your digital life is safe, your PC is in tip-top condition, your most valuable information is secure and your family is protected

Kaspersky Internet Security

Complete PC & Netbook Protection

Kaspersky Internet Security 2011 has everything that you need to stay safe and secure while you're surfing the web. It provides constant protection for you and your family – whether you work, bank, shop or play online.

Kaspersky Anti-Virus 2011

Essential PC Protection

Kaspersky Anti-Virus 2011 – the backbone of your PC's security system, offering real-time automated protection from a range of IT threats. Kaspersky Anti-Virus 2011 provides the basic tools needed to protect your PC. Our award-winning technologies work silently in the background while you enjoy your digital life

Kaspersky Mobile Security

Protect your mobile privacy. **Now for Android and BlackBerry!**

You make calls, send SMSs, browse the web and communicate via social networks every day. Your smartphone is your life. Kaspersky Mobile Security keeps your private life truly private.

Kaspersky Password Manager

Protect Your Digital Identity

Kaspersky Password Manager is an indispensable tool for the active Internet user. It fully automates the process of entering passwords and other data into websites and saves the user going to the trouble of creating and remembering multiple passwords.

When you use Kaspersky Password Manager to log in, you can rest assured that your data is safe. The software creates exceptionally strong passwords and prevents your login information from being stolen. All confidential data is encrypted and kept in a dedicated database on your computer.

Kaspersky Password Manager makes your web experience safer, quicker and more convenient

Kaspersky KryptoStorage

Your Personal Digital Vault

Kaspersky KryptoStorage securely protects your personal files against unauthorized access and data theft using cutting-edge transparent encryption technology and allows deleted files to be permanently erased from your computer.

Kaspersky KryptoStorage ensures that your encrypted data stays confidential in the event of malware attacks, unsecure WiFi connections and even if your laptop or storage device is lost or stolen. The encrypted data is only accessible via a strong password that is highly resistant to brute force attacks.

Kaspersky KryptoStorage safeguards your private life from unwelcome attention

Kaspersky® Small Office Security

Kaspersky Small Office Security is exclusively designed for small businesses. It delivers highly affordable world-class PC and server protection that is quick and simple to install, configure and use. You can manage your entire business network security from a single PC – performing all the tasks needed to keep your business reputation safe and your confidential information secure, without leaving your desk. Kaspersky Small Office Security takes care of your network's protection so you can take care of your business

Real-time protection from Internet threats

With Kaspersky Lab's powerful malware signature database, frequent updates and real-time protection capabilities, your valuable business data remains safe from even the latest IT threats, while scans run in the background without disturbing your employees, allowing them to stay focused on their work.

Centralized security management of your server and PCs

Kaspersky Small Office Security's powerful yet simple interface makes protecting your business network straightforward. You can manage the protection of your entire system from one PC: choose when to launch scans and backup tasks, or check when you need to renew your license, it's all so easy!

Control web and application usage

Kaspersky Small Office Security helps you to maintain productivity in the workplace. Now you can control who uses social network or gaming sites during working hours, limit file downloads and manage employee Internet and application access. Reports detailing network PC usage are quick and easy to generate too.

Real-time protection for business operations

Kaspersky Small Office Security is flexible enough to meet your business' needs. Choose when and how often you back up your valuable business data; store and securely transfer sensitive information in encrypted, password-protected files; run the Password Manager utility to generate, store and auto-insert hard-to-crack passwords and use File Shredder to irreversibly delete sensitive data.

No IT expertise required

Never managed network security before? No problem! Kaspersky Small Office Security has been especially designed to provide world-class protection for your business network, without the need to be an IT genius, so your network will be protected in no time.
